

What Is Changing

Intermountain has created a new centralized process to help caregivers know, share, and honor the healthcare wishes of the patients we serve. The Advance Care Planning (ACP) Dashboard is a third-party storage and retrieval system for all ACP documents stored in iCentra. The dashboard provides all caregivers with a single easy way to locate documents in the patient record and allows electronic creation of the UT - Provider Order of Life Sustaining Treatment Orders (POLST) and ID - Physician Orders for Scope of Treatment (POST).

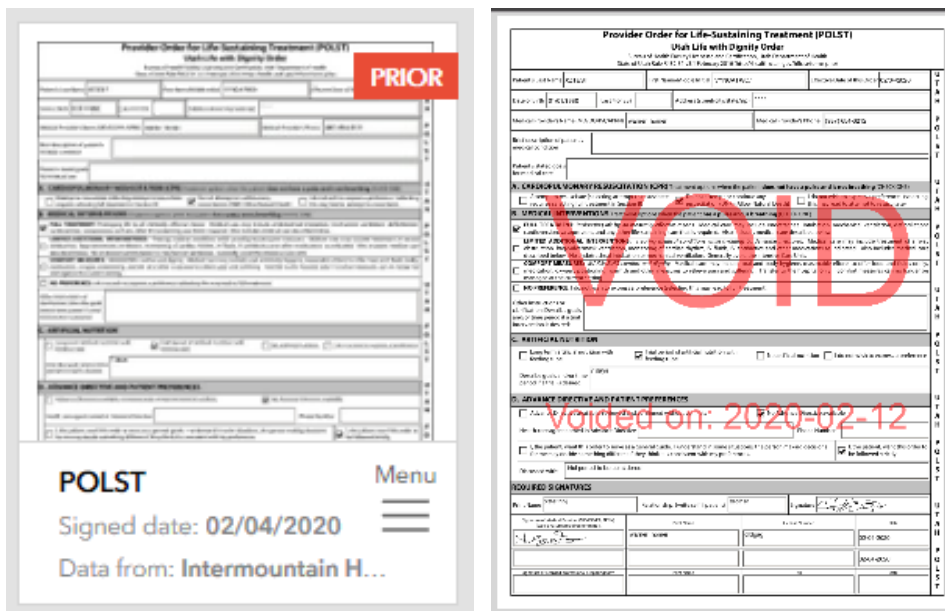

Why It Is Changing

To provide all caregivers with an easy and reliable way to create, locate and share ACP documents across the system while finding a simple way to quickly know if a patient has a document on file.

Viewing Voiced Documents

The void watermark may appear on documents via two methods.

1. **Prior Documents** are documents that have been superseded by a current document, thereby rendering this document as invalid as the content of the document are not valid anymore. The Prior status is indicated by a red Prior stamp on the form, as well as a void watermark and date on the document.

- 2. **Void Documents** are documents where the patient has decided that the content of the document is not valid anymore. This document may or may not be superseded by a current document. This status is indicated by a red void stamp on the form, as well as a void watermark and date on the document.

This is a screenshot of a 'VOID' document titled 'Utah Physician Orders for Scope of Treatment (POLST)'. The document is heavily watermarked with the word 'VOID' in large, semi-transparent letters. At the top right, there is a red box with the word 'VOID' in white. The form contains various sections for patient information, medical history, and treatment preferences. At the bottom, it says 'POLST Signed date: 01/30/2020 Data from: Intermountain H...'.

This is a screenshot of a 'VOID' document titled 'Provider Order for Life-Sustaining Treatment (POLST)'. The document is heavily watermarked with the word 'VOID' in large, semi-transparent letters. At the bottom, there is a red stamp that says 'Voided on: 2020-02-12'. The form contains various sections for patient information, medical history, and treatment preferences.
