

How to Use iDesktop (Citrix VDI) to access Intermountain Applications iCentra, Visage and iCitrix - Windows 7-11

This is a basic overview of the login steps for iDesktop (Citrix VDI) in Windows 7-11. Either you or Support Personnel should have already stepped through the installation guide at the [Affiliated Support Services](https://www.intermountain.org/affiliated-support-services) site under **Windows User Resources Option 3**, where this PDF is also located.

1. Double-click the *iDesktop* desktop shortcut, which should open a browser to <https://idesktop.intermountain.net>

2. Enter your Intermountain userid (username) and, if this is your personal device, you can check the *Remember my username* box then click Next. If this is your first time logging in on the device, enter your password then click Sign In. The Ping ID authentication window will appear (where you may need to click *Sign On*). Once you authenticate on your smartphone, it will log into iDesktop.

3. Once logged in, click on *Affiliated Physician* then **Open**, which will launch iDesktop in Citrix Workspace. iCentra, Visage and iCitrix are among the desktop shortcuts available, as **circled** directly below.
