Settings Sign On

NOTE: The password sign-in step is usually required when logging in for the first time on a new device, then you can usually use Ping ID on future logins.

1. Open a web browser on your web-enabled device (e.g. PC, Mac, Tablet, Smartphone), go to <http://outlook.com/owa/intermountainmail.org> then type in your assigned imail2.org email address and click *Next*, as shown above. (The address will follow this pattern: *firstname.lastname@icemail2.org*)
2. If you entered a valid imail2.org address, it will progress to the next dialog window. Enter your **Master Password** (the password used for most Intermountain apps, including iCentra) in the *Password* field and click *Sign In*.
3. After entering your Master Password correctly, a third window will open where you can click Ping ID. Authenticate using your chosen method.
4. Upon verification/successful login, you will be at the Microsoft 365 Home, like below. Click the **Apps** button in the upper left (as shown below) and choose *Outlook* to access email or, if applicable, *SharePoint* or *Teams* further down.

SharePoint Teams

REGARDING SMARTPHONE ACCESS:

- In iOS (iPhone), you will get the most features if you use either the **Safari** or Microsoft **Edge** browsers.
- In Android, you will get the most features if you use either the **Chrome** or Microsoft **Edge** browsers.
