

iCentra Mobile App Access

Content Owner: iCentraMobileApplications@imail.org

Last Modified: 5/25/2017 10:32 AM

One option for the physician who does not have iCentra access at home is to use the mobile applications of iCentra. **To request access to the iCentra Mobile Apps:**

Instructions for Affiliated Providers

1. Email iCentraMobileApplications@imail.org with the following information;
 1. Full Name:
 2. Username (LDAP ID):
 3. User Title:
 4. User Primary Location:
 5. User Email Address:
 6. Number of Devices (Needing access codes):
 7. Describe your device(s) and what you would like access to:
2. Instructions and an access will be sent to email address provided.

Notes

- Once you receive your activation codes, download and activate the appropriate applications from the App Store.
 - By searching for Cerner in the App store you can then find and download any of the 5 approved applications below
 - FetaLink+ (iOS)
 - PowerChart Touch (iOS)
 - Message Center (iOS and Android)
 - Camera Capture (iOS and Android)
 - InstaNote (iOS and Android)
- If you have additional questions or comments, please send an email to iCentraMobileApplications@imail.org and we will respond as quickly as we can.
- Applications should only be accessed based on business need and all Electronic Health Record (EHR) Auditing requirements pertain to the mobile applications and are monitored for security and privacy.

FETALINK+

With **FetaLink+**, surveillance information that is available at the bedside can be accessed from any location through a mobile device with either cellular or WiFi connectivity, driving efficiency at the point of care. Functionality includes:

1. Provides comprehensive patient list.
 2. Displays most recent key obstetrical data, including ruptured membrane, gravida para, and cervical exam.
 3. Displays both fetal and maternal monitoring waveform data.
 4. Allows Providers to review all monitoring data from the current episode.
 5. Fetal tracing can be viewed when user is in the annotation summary view.
 6. Ability to view both clinician and device annotations at relevant times on the strip.
 7. Ability to view Medication and IV administration annotations on the strip.
 8. Ability to view annotations made by the bedside clinician.
 9. Ability to view maternal vital signs captured from the fetal monitor.
- FetaLink+ is a diagnostic aid that does not replace the clinician's judgment concerning interpretation of data or appropriate treatment.
 - FetaLink+ requires you to be provisioned for iCentra and is intended for Intermountain.

PowerChart Touch

PowerChart Touch for iPad and iPhone supports fast, easy and smart workflows for physicians. PowerChart Touch allows physicians to complete both ambulatory and inpatient workflows, including:

1. Review their schedule, patient list, and patient charts
2. Access the Physician Handoff, a standardized approach to transfer care of a patient between providers
3. Review patient's demographic information
4. Take patient's photo
5. Review, create, and sign notes
6. Review, add, and modify allergies, problems & histories
7. Review clinical results, radiology reports, and pathology reports
8. Review all orders including medication orders
9. Ability to place some orders
10. Prescribe and refill some medications with formulary support, electronic prescribing and printing

11. Clinical checking for safe prescription writing including drug-drug and drug-allergy checking
12. Dictate with Nuance voice recognition
 - PowerChart Touch also provides secure access for physicians needing access to the EHR outside of the clinic walls.
 - PowerChart Touch requires you to be provisioned for iCentra and is intended for Intermountain Employed and Affiliated Licensed Individual Practitioners (Physician, Residents, Nurse Practitioners, Physician Assistants).

Message Center

PowerChart Message Center for iPad and iPhone supports fast, easy and smart messaging workflows for physicians. PowerChart Message Center facilitates physician workflow with the ability to:

1. View messages, reminders, consults, receipts, sent items and trash
 2. Compose, reply, and forward phone messages.
 3. Cosign and endorse results.
- PowerChart Message Center also provides secure access for physicians needing access to the EHR outside of the clinic walls.
 - PowerChart Message Center requires you to be provisioned for iCentra and is intended for Intermountain Employed and Affiliated Licensed Individual Practitioners (Physician, Residents, Nurse Practitioners, Physician Assistants).

Camera Capture

Cerner Camera Capture for iOS and Android devices supports fast, easy, and smart workflows for the clinician. Camera Capture enables users to securely acquire and store clinical photos to the patient record.

Instanote

Cerner Instanote for iOS and Android devices is an easy-to-use application for the provider to dictate a note. Instanote automatically transcribes the text and allows the provider to sign their note.
