

OR Marketplace Overview

This job aid is intended for Proceduralists and Clinic Schedulers.

OR Marketplace is a tool to request procedural block time. This applies to both surgical and endoscopy block time.

In OR Marketplace, you can see procedure block time you own as well as time you do not own. You can take action on both time you own, as well as time you are authorized for, but do not own. If you're a proceduralist, you can also access this activity in Haiku and Canto.

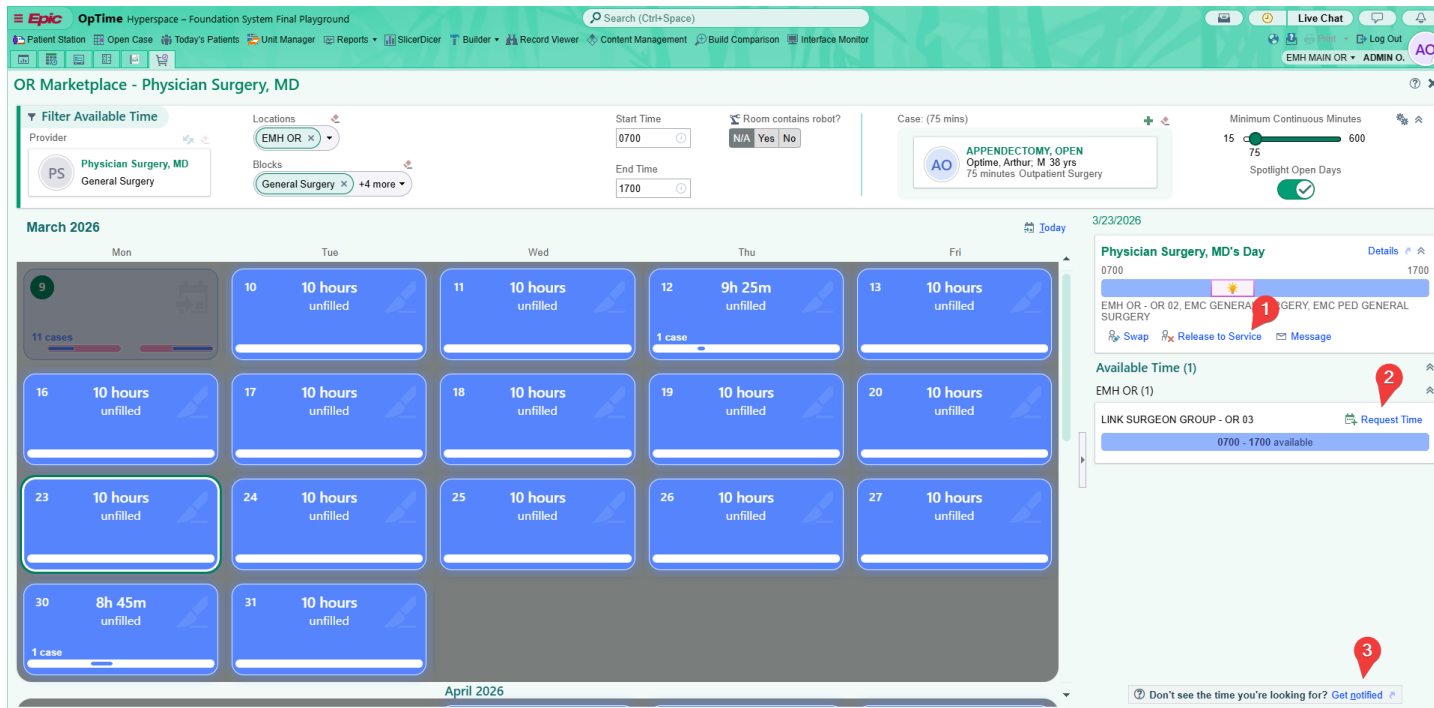

- Days colored in **blue** are days you have block time
- **Pink** lines at the bottom of the days show your already scheduled procedures

The OR Marketplace is a tool that changes **depending on the provider you are finding time for.**

- Use **1** to switch the provider you are viewing the tool for.
- Add a case from your unscheduled pool using **3**.
- This will automatically change **4** and **5** to match the case specifications.
- Adding a case may change **2** if your case needs a robot.

Request or Release Time

- Use **1** to release your block on a chosen day. You may release your block to a group, service line, or unblocked time.

- Once you have added a case to OR Marketplace, it will highlight open days for you with the case length you need.
- Use **2** to send a request directly to the Facility Case Scheduler
- If you can't find time on the Marketplace, use **3** to join the standby list. This will notify you when time opens on the schedule that day.

FAQs

- Can I add more than one case to the Marketplace at once?
 - Yes, the Marketplace will adjust the "Minimum Continuous Minutes" field to be the length of those cases added together.
- Do I have to add a case to change the filters?
 - No, you may filter by robot, start/end times, and Minimum Continuous Minutes without a case plugged in.
- Does the Marketplace work for scheduling appointments?
 - No, Marketplace is purely a case-based tool.
