

# Scheduling Endo Procedures Between June 19<sup>th</sup> – July 7<sup>th</sup>, 2026

This information outlines the process for scheduling endoscopy procedures during the transition from Radiant to OpTime within Epic.

## Affiliated and Employed Medical Group GI/Endo Clinics:

- 
- **Before June 19:** Continue current workflows, regardless of scheduled procedure date.
    - On **June 19**, all endoscopy procedures scheduled for **after July 8 go-live** will be converted from Radiant appointments to OpTime cases.
  - **June 19 - July 7:** Preprocedural order sets will include both options:
    1. Existing appointments/procedure orders (e.g., Colonoscopy, EGD, Bronchoscopy)
    2. New case request order
  - If the procedure will occur *before July 8*, choose an appointment/procedure order in the order set as you have done previously (e.g., Colonoscopy, EGD, Bronchoscopy).
  - If the procedure will occur **July 8 or later**, choose the **case request** order and follow the new process.
  - On **July 8**, the old appointment process will be retired, and all endoscopy and pulmonary procedures will be scheduled using new OpTime tools via case requests. The old procedure orderables (e.g., Colonoscopy, EGD, Bronchoscopy) will be removed from the order sets.

**Facility Case Schedulers – Please help clinics be aware of this information.**
